| 250     | 250       | 249       | 8                         |                 |
| 300     | 298       | 297       | 10                        |                 |
| 315     | 313       | 312       | 10                        |                 |
| 350     | 348       | 347       | 10                        |                 |
| 400     | 400       | 398       | 10                        |                 |
| 450     | 449       | 447       | 10                        |                 |
| 500     | 499       | 497       | 10                        | 0.0             |
| 560     | 559       | 557       | 10                        | 0,9             |
| 630     | 629       | 627       | 10                        |                 |
| 710     | 709       | 707       | 10                        |                 |

#### **Ends**

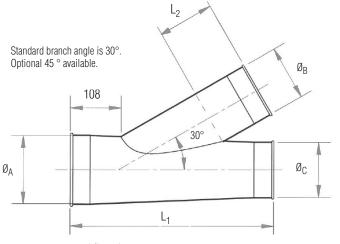

Standard QF end can be changed to Raw ID (I/D), Raw OD (O/D), Hose Adapter (FX), Flat Bar Flange (FL), or 6mm turned out edge (FB).

#### Construction

Seam: longitudinal seam is lapped, spot welded, and caulked.

Collars: located on the exterior side of each port and considered as air flow non-directional. Collars have lapped, spot welded and caulked longitudinal seam.

If air flow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, order OFS Branch.

 $L_1 = (\emptyset_B \times 2) + 206$ 

 $L_2 = ( \emptyset_R / 2 ) + 58$ 

 $\emptyset_{\mathbb{C}}$  must be smaller than or equal to  $\emptyset_{\mathbb{A}}$ 

 $\emptyset_R$  must be smaller than or equal to  $\emptyset_C$ 

| Temperature Rating of Product<br>Components |                     |                 |  |  |

| Joka Seal Metal<br>Sealant 2315           | Acetone blend | AAMA Specification 801.1 |  |  |  |

### **Additional Notes**

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 200° C.
