

## QF Cut-In 30° or 90°

| Ø <sub>2</sub><br>mm | O/D<br>mm | I/D<br>mm | Rolled Edge<br>(nom. mm.) | Thickness<br>mm |
|----------------------|-----------|-----------|---------------------------|-----------------|
| 080                  | 79        | 78        | 6                         |                 |
| 100                  | 98        | 97        | 6                         |                 |
| 125                  | 124       | 123       | 6                         |                 |
| 140                  | 139       | 138       | 6                         |                 |
| 150                  | 148       | 147       | 6                         |                 |
| 160                  | 159       | 158       | 6                         |                 |
| 180                  | 179       | 178       | 8                         | 0,7             |
| 200                  | 200       | 199       | 8                         |                 |
| 224                  | 224       | 223       | 8                         |                 |
| 250                  | 250       | 249       | 8                         |                 |
| 300                  | 298       | 297       | 10                        |                 |
| 315                  | 313       | 312       | 10                        |                 |
| 350                  | 348       | 347       | 10                        |                 |
| 400                  | 400       | 398       | 10                        |                 |
| 450                  | 449       | 447       | 10                        |                 |
| 500                  | 499       | 497       | 10                        | 0.0             |
| 560                  | 559       | 557       | 10                        | 0,9             |
| 630                  | 629       | 627       | 10                        |                 |
| 710                  | 709       | 707       | 10                        |                 |

## Ends

Standard QF end can be changed to Raw ID (I/D), Raw OD (O/D), Hose Adapter (FX), Flat Bar Flange (FL), or 6mm turned out edge (FB).

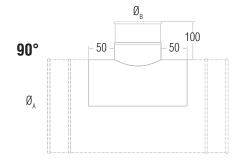

## Construction

Seam: longitudinal seam is lapped, spot welded, and caulked.

**Collars:** located on the exterior side of each port and considered as air flow non-directional. Collars have lapped, spot welded and caulked longitudinal seam.

If air flow directional product is required, it must be stated on the PO and additional cost may be incurred. A raised lap seam and spot weld are used for attaching the collar to the body and no caulking is used. If caulking is required, order QFS Cut-in.

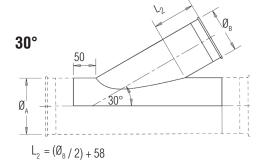

| Temperature Rating of Product<br>Components |            |                              |  |  |
|---|------------|------------------------------|--|--|
| ° C   | Cut-In     | Sealants                     |  |  |
| 200°  |            |                              |  |  |
| 121°  | Galvanised |                              |  |  |
| -20°  | Steel      | Joka Seal Metal Sealant 2315 |  |  |

## **Additional Notes**

At temperatures ranging between 200° C and 250° C, the zinc-iron alloy layers in galvanised steel will continue to provide a high level of protection from corrosion. However, there may be some peeling, changes in mechanical properties, and reduction in the corrosion protection. Recommended max. service temperature is 200° C.

 $\mathcal{Q}_{_{\mathrm{B}}}$  must be smaller than or equal to  $\mathcal{Q}_{_{\mathrm{A}}}$ 

| Compliance / Rating of Product Components |               |                          |  |  |  |
|---|---------------|--------------------------|--|--|--|
| Product                                   | Material      | Compliance / Rating      |  |  |  |
| Cut-In                                    | Galvanised    | DX51D with Z275 Coating  |  |  |  |
| Joka Seal Metal<br>Sealant 2315           | Acetone blend | AAMA Specification 801.1 |  |  |  |
